# Versa Vibe™

## DLS ♬ Effects

**Welcome to the pure analog, *Versa Vibe* by DLS Effects! This new effect is called *"Versa Vibe"* for a reason… it is more *versatile* than most vibe effects out there! DLS innovation includes *Optical Technology* plus industry *New* controls such as; *Bass Throb*, *Wet-Dry*, and *Waveform* pots to dial in any Vibe sound imaginable! There is even a new internal *Brightness* pot to adjust brighter or darker Chorus (Vibe) Tone.**

**Switch between *Vibrato* & *Chorus* for pitch bending vibrato, or signature Trower and Gilmour vibes. Dial in that classic Jimi *& SRV* sound, or vintage Magnatone® amp vibrato, not to mention some new radical vibes like double pulse throb sounds. Select *Vintage* for more intense, thicker, traditional sounds, or *switch to Modern* for brighter tones.**

**A charge pump circuit increases the analog voltage so you get warm, dynamic, high headroom *pure analog* sound without clipping! An *Expression* pedal input jack is available for rate with a foot pedal. True switch bypass and non polarity 9vdc input put the *Versa Vibe* over the top.**

***Rate:* slow to fast pulsing Vibes**

***Depth:* controls intensity of Vibes**

***Waveform:* controls Smooth to Throbbing Radical Vibes!**

***On/Off:* switch true bypass (input to output)**

***Dry~Wet:* dial in dryer or liquid vibrato or chorus!**

***Volume:* adjust output level (mild to lead boost)**

***Modern~Vintage:* set for 60s vintage, or brighter Modern sound**

***Vibrato~Chorus:* set for pitch bending Vibrato or Liquid Vibes/phase-chorus**

***Bass Throb:* adjust how much bass throb in your Vibes!**

***Small Size:* Measures only 5"L x 4"W x 2.5"**

***9VDC:* operates from 9vdc source, polarity does not matter!**

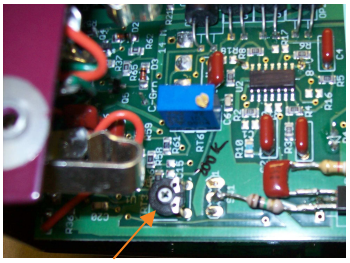
***Expression input:* Use an external expression pedal to control the Rate**

***In, Out* ¼" jacks**

## ***Versa Vibe Features:***

- **All analog circuitry!**
- **Optical Technology produces extremely *warm* sounds with *versatility*.**
- **Waveform:** Controls the personality of the vibes from smooth to abrupt
- **Wet/Dry:** Use to adjust the Chorus or Vibrato from liquid to dryer sounding chorus and vibes
- **Bass Throb:** Adjusts how much bass throb from mild to heavy bass throbs
- **Depth:** Controls the depth of the Vibes
- **Rate:** Controls the speed of the Versa Vibe
- **Rate LED:** Red LED blinks at the Versa Vibe rate
- **Modern~Vintage:** set for 60s style thick vintage, or brighter Modern sound
- **Vibrato~Chorus:** set for pitch bending Vibrato or Liquid Vibes
- **Output Volume:** Volume output on OUTA (from mild to boost levels for leads)
- **Internal Brightness Pot:** Adjust brighter or darker Chorus Vibes
- **On/Off LED:** Green LED lit when the effects is ON
- **On/Off Switch:** Engages the effect when ON, Switched bypass when OFF.
- **INA jack:** ¼" jack, instrument input
- **OUTA jack:** ¼" jack Output to amplifier
- **Expression Input:** Plug expression pedal to control Rate (recommended Yamaha FC-7, Roland EV-5, Boss )
- **Internal INA Pot:** Adjusts the input gain level of Input A
- **9vdc input:** 2.1mm jack, <u>any polarity</u> (Worry free if using your 9volt pedal board supply) ***(Input voltage 9vdc to 14vdc, Input current is 30ma at 9vdc)***
- **Internal charge pump:** increases voltage for pure analog sound with high head room to preve
- **9vdc transformer included**
- **Small Size:** 5"L x 4"W x 2.5"H
- **All steel enclosure, steel pots, and steel jacks**
- **Powder coated enclosure (more durable than standard painting)**

***Brightness Pot***
Clockwise= Brighter (factory set ¾ turn Clockwise).



***Input Gain Pot***, clockwise increases, (factory set ¼ turn clockwise)
